

BIOTONUS CLINIQUE BON PORT is located on the shores of Lake Geneva in a haven of greenery, flowers, peace and quietness. All our spacious rooms have a south-facing balcony with a magnificent panoramic view over the Alps.

1. Where the toxins come from

Each day we are confronted with many external aggressions such as irregular and unbalanced diet, pollution, tobacco, alcohol.

A rich diet, that is a diet with large amount of animal fats, processed food with additives and colourings, canned food, ingestion of too much sugar and salt. The presence of carcinogenic substances such as heavy metals, pesticides and fertilizers. The pollution. Smoking and excessive intake of alcoholic beverages. Leading a stressfull life style, which causes fatigue, sleeping difficulties, anxiety and therefore depression. All these factors contribute to accelerate cell damage, a decrease in cell function and premature ageing.

The principal of our detox program is to help the elimination of different toxins in order to find a suitable internal biological balance to improve to health, beauty and well-being.

“mens sana in corpore sano”

2. Check-up & Treatment

The detox program is only undertaken after a complete medical check-up at BIOTONUS CLINIQUE BON PORT, which includes :

- a medical consultation (medical history and complete clinical examination)
- laboratory analyses
- tumor markers tests
- Radiology examinations (thorax, upper and lower spine)
- cardiology (ECG)
- morpho-nutritional analysis
- upper and lower abdominal ultrasonography
- heavy metals trace screening in the urine
- total body composition examination

The treatment starts after the full check-up and consists of nursing care, medical visits, dietician care, total body analyses, nutrition program + Biotonus specific antioxidants alimentary complements, as well as selected personalized body cares (daily program).
